

# DC Conductor Rails: One Day Sentinel Certification

## DC Conductor Rails: One Day Sentinel Certification

The DC Conductor Rails One Day Sentinel Certification course will provide learners with the skills and knowledge to enable them to undertake work near or adjacent to DC conductor rails. This course is any individual that will be required to undertake work in and around third and fourth rail areas, as they will be required to have this competency on their Sentinel Card. This course can be undertaken as a third day of training following the Personal Track Safety course.

### Course Content

The course will provide the learner with the knowledge, skills and behaviours that will need to be adhered to at all times to work safely near or adjacent to DC conductor rails. They will be able to describe the principles of the DC electrified system, identify the main components to the DC system, and the hazards associated with working near these systems.

### Re-certification

Re-certification for this course is available as a joint Personal Track Safety & DC Conductor Rails certificate. This course will take one day, and will reassess the knowledge in relation to personal safety on and near the line. They will also be able to demonstrate safe working practices for working near or adjacent to DC conductor rails, identify the main components of the system, and all hazards associated with working in those areas.

### Sentinel Scheme

The Sentinel system is a scheme from Network Rail that ensures all individuals that work in the railway industry are competent in their job role, and are medically fit to do so. Only approved training providers can deliver this training, with learners being subject to specific criteria they need to fit before being eligible to take part. This will be provided when making a booking, and we will encourage you to thoroughly check the learner meets this criteria before proceeding with the booking.

### Developing U

If you are interested in this course, please contact Developing U directly to discuss pricing and course arrangements. Please state whether the interest is in the full course certification, or the re-certification of an existing individual with the DC Conductor Rails certification.
