

ES Workplace Assessment: One Day Sentinel Certification

Engineering Supervisor Workplace Assessment One Day Sentinel Certification

The Engineering Supervisor Workplace Assessment One Day Sentinel Certification course is required for individuals wishing to maintain their ES certification. They will only be eligible for this assessment if they have completed the correct number of log book entries and the workplace assessment can take place in the correct timescale. If the individual fails to carry out their assessment in the correct timescale, they will lose their competency and will have to undergo the initial ES training again. This assessment can take place on a day or night shift, but no more than two individuals can be assessed in one shift.

Course Content

On completion of the course, the individual will have proven that they have set up and maintained a safe system of work in accordance with the Rule Book and Railway Group Standards. They will also have demonstrated their knowledge in other areas of their qualification that were not witnessed at the time of the assessment.

Sentinel Scheme

The Sentinel system is a scheme from Network Rail that ensures all individuals that work in the railway industry are competent in their job role, and are medically fit to do so. Only approved training providers can deliver this training, with learners being subject to specific criteria they need to fit before being eligible to take part. This will be provided when making a booking, and we will encourage you to thoroughly check the learner meets this criteria before proceeding with the booking.

Developing U

If you are interested in this course, please contact Developing U directly to discuss pricing and course arrangements, to ensure the individual meets the criteria and the course is suitable for them.
